Mail ID: ashok.kantepally@gmail.com
Mobile: +91- 8121413523
Senior DevOps Engineer

Professional Summary:

- Having **7 years of experience** in implementing **DevOps** strategy in various environments of Linux and Windows.
- Administering **GIT** repositories and creating branches, resolving merge conflicts, reviewing pull requests and hands on experience on branching strategies.
- Expertise in **Azure** cloud services like **Azure-Images, VNet, VM's, Load Balancers, Azure Blob Storage, Azure Functions, Logic apps, Azure Monitor, Azure AD, Azure DNS, IAM, Azure SQL Database, Azure App Services** with Responsible for maintaining infrastructure through **ARM & Terraform**.
- Expertise in **AWS** cloud services like **EC2 Instances, VPC, AMIs, Elastic Load Balancers (ALB/NLB), Amazon S3, AWS Lambda, AWS Step Functions, Amazon CloudWatch, AWS IAM, Amazon Route 53, Amazon RDS, AWS Elastic Beanstalk** with responsibility for maintaining infrastructure through **CloudFormation & Terraform**.
- Hands-on experience in working with **Terraform modules**.
- Developed a fully automated **CI/CD** pipeline using **Jenkins & Azure DevOps YAML**, integrating **ECS** for seamless deployment of containerized applications.
- Worked on **Jenkins** by installing, configuring and maintaining for the purpose of **Continuous Integration (CI)** and for end-to-end automation for all build and deploy.
- Ability to build deployment scripts and automated solutions using **PowerShell & Python scripting**.
- Experience with container-based deployments using **Docker**, working with Docker images, Docker Containers, Docker files and Docker registries.
- Developed a **Continuous Deployment** pipeline using **Kubernetes, ECS & XL release** tool.
- Implemented Monitoring and reporting solutions across a range of environments and platforms using **CloudWatch & cloud Aware**.
- Strong ability to **troubleshoot & debug** any issues occurred while integrating, building, deploying and production support.
- Experience in using Atlassian's products like **Jira, Confluence**.

Technical Skills:

- AWS, AZURE
- Git, Azure Repos
- CI/CD- Azure DevOps, Jenkins, XL release
- CloudFormation, Terraform
- Build tool - Maven, MS-Build
- configure management - Ansible
- Docker
- Kubernetes
- PowerShell, Python
- JIRA
- Linux and Windows

Education Details:

Completed **B. Tech** in JNTU Anantapur with stream Electrical engineering (**EEE**) 2014.

Work Experience:

- Working as Senior Engineer in Coforge from Oct 2024 to Till Date.
- I worked as Software Engineer in OUTSYSTEMS from April 2022 to OCT 2024.
- I worked as Software Engineer in ISG NOVASOFT TECHNOLOGIES from May 2018 to April 2022.
- I worked as Junior Associate in Star Tele Services from Feb 2017 to uly 2017.

Project Experience:

Project #5

Title : Coforge
Client : Gate Group
Role : Senior Engineer
Duration : October 2024 to Till Date
Environment : Azure Cloud Services, AWS Cloud Services, Azure Repos, Azure DevOps, Terraform, Docker, ECS, App Services, PowerShell, Python, ServiceNow

Description :
Working as a Senior Engineer delivering cloud infrastructure, automation, CI/CD enablement, Terraform standardization, and security hardening across **Azure and AWS**. Focus areas include building reusable **laC Terraform**, onboarding cloud resources into Terraform, implementing governance policies, enhancing **Azure DevOps** pipelines, automating cloud provisioning, ensuring smooth infrastructure deployments, integrating secure secret management, and streamlining enterprise cloud operations.

Roles & Responsibilities:

- Managed cloud environments across **Azure and AWS**, covering computer, networking, storage, and platform services.
- Provisioned and configured **cloud infrastructure** components including VMs, load balancers, VNets/VPCs, subnets, firewall rules, and DNS.
- Built and maintained **Azure DevOps** CI/CD pipelines to automate deployments, testing, and infrastructure delivery.
- Developed reusable **Terraform modules**, imported existing cloud resources into IaC state, and standardized infrastructure provisioning.
- Integrated Azure **Key Vault** and AWS Secrets Manager into pipelines, implemented policy-based governance, and enhanced cloud security controls.
- **Automated provisioning**, configuration, and deployment workflows using Azure DevOps, PowerShell, and Python scripting.
- Performed **troubleshooting**, monitoring, patching, and lifecycle management across Dev, QA, and Prod cloud environments.
- I worked with development, QA, and operations teams to streamline **DevOps workflows** and improve cloud delivery efficiency.

Project #4

Title : OutSystems
Client : Outsystmes Product
Role : DevOps Engineer
Environment : Azure, AWS, ECS GIT, CI/CD Azure DevOps, XLRelease, Docker, Kubernetes, CloudFormation, Terraform PowerShell, Python.
Duration : April 2022 to Oct 2024
Description : OutSystems is a Low-code development platform which provides tools for companies to develop, deploy and manage omnichannel enterprise applications.

Roles & Responsibilities:

- Responsible for creating **Images and** Generating the **instances** with the templates and using **AZURE, AWS** resources.
- continuously monitoring AWS resources and maintaining **VNet, VM’s, Load Balancers, Azure Blob Storage, Azure Functions, RDS & IAM.**
- Responsible for Setting up and maintaining **CI/CD** pipelines for building, testing, and deploying Outsystem Products using tools like **Azure DevOps.**
- Ensuring reliable and efficient code deployment with proper monitoring and rollback mechanisms with **Kubernetes (K8’s) and XL release.**
- Designing, implementing, and managing automated infrastructure provisioning using tools like **Terraform and CloudFormation.**
- Continuous in maintaining and increasing the stability and performance of the Automation process using PowerShell **& Python scripting.**
- Continuous **Troubleshooting** logs and metrics to identify and **Debugging issues** and improve system performance.
- Worked intensively on removing secrets from the responsible repository from the Git with the **API** and some scripts.
- Experience in configuring and updating the servers using configuration management tools like Ansible and Experience in Containerization tools like Docker.
- **Collaborating with cross-functional teams,** including developers, operations, and QA, to streamline processes and foster a DevOps culture.

Project #3:

Title : ISG NOVASOFT TECHNOLOGIES
Client : Synchrony financial
Role : DevOps Engineer
Duration : Nov 2020 to April 2022
Environment : AZURE, AWS, GIT, Jenkins & ADO for CI/CD, Maven, Docker, Ansible, Linux, Kubernetes, Terraform, CF, Python.

Description :
Software publishing includes production, supply and documentation of ready-made (non-customized) software, operating systems software, business & other applications software, computer games software for all platforms. Consultancy includes providing the best solution in the form of custom software after analyzing the user’s needs and problems

Roles & Responsibilities:

- Worked on Multiple **AWS** instances, set the security groups, Elastic Load Balancer and AMIs, Auto scaling to design cost effective, fault tolerant and highly available systems.
- Configured and managed security groups and **VPC.**
- Automated infrastructure provisioning and application deployment using Infrastructure as Code (IaC) principles with **Terraform.**
- Collaborated with development teams to streamline **CI/CD** processes, reducing time-to-market software releases.
- Implemented **Continuous Integration/Continuous Deployment (CI/CD)** pipelines using Jenkins and GitHub.
- Set up and manage **Kubernetes** clusters on **AWS EKS** using Terraform.
- Deployed **microservices**-based applications using Jenkins pipeline on Kubernetes.
- **Monitored** health of Amazon EC2 instances and other AWS services.

Project #2

Title : ISG NOVASOFT TECHNOLOGIES
Client : Diligenta Friends Life, U.K
Role : AWS Cloud/DevOps Engineer
Duration : May 2018 to Oct 2020
Environment : Jenkins CI/CD, MS-BUILD, AWS, Ansible, GIT.
Description :

As an AWS Cloud/DevOps Engineer at Diligenta Friends Life, U.K., Optimized infrastructure

and deployment processes for Friends Life Services. Leveraging Azure DevOps, Jenkins CI/CD, Ant, AWS, Ansible, and GIT, I collaborated closely with the client to enhance service delivery

Roles & Responsibilities:

- Managed cloud computing infrastructure on **AWS**, ensuring adherence to best practices and security standards.
- Collaborated with **cross-functional** teams to architect and implement scalable solutions meeting business requirements.
- Deployed and operated various AWS services including **VPC, EC2, S3, EBS, IAM, ELB**, CloudFormation, and CloudWatch.
- Configured security groups and VPC to ensure secure and **isolated environments**.
- Utilized Amazon Glacier for data archiving and S3 for durable and available data **storage**.
- Implemented cost-effective, fault-tolerant, and highly available systems using Auto Scaling and Elastic Load Balancer.

Project #1

Title	:	Telecom Data Consolidation & Migration Project
Client	:	Star Tele Services Pvt Ltd
Role	:	Junior Associate
Duration	:	Feb 2017 to Dec 2017
Environment	:	CRM, Excel, PowerShell, SQL, GIT

Description:

As a Junior Associate in the Telecom domain, I was responsible for handling, validating, and transforming large volumes of customer and operational data. The project involved consolidating data from legacy Excel-based systems, cleaning and restructuring it, and preparing it for seamless migration into the new CRM platform.

Roles & Responsibilities:

- Collected, analyzed, and consolidated large datasets from legacy Excel sources for CRM migration.
- Performed data cleaning, formatting, and transformation to meet CRM upload requirements.
- Created SQL queries to validate data integrity and ensure accurate mapping between old and new models.
- Automated repetitive data-preparation tasks using PowerShell to improve efficiency and reduce errors.
- Collaborated with business and technical teams to understand data structures and migration rules.
- Ensured data compliance and maintained accuracy during the migration from Excel to CRM.
- Used GIT for version control of files, scripts, and documentation throughout the project.
- Prepared reports and documentation highlighting data issues, exceptions, and migration results.
- Supported CRM upload by generating clean, standardized data files and performing post-migration checks.
- Provided troubleshooting support for data-related issues during and after migration activities.
